## INTRODUCTION

---

[Angus Reid Institute](#) is a national, not-for-profit, non-partisan public opinion research organization.

In this poll on global and national threats to security and safety, just over half (55%) of Canadians say they aren't confident in the ability of domestic security services to prevent homegrown radicals from carrying out terrorist attacks in Canada.

Queen's University Library (QUL) Data Services worked collaboratively with Angus Reid Institute to document and archive the dataset described here. QUL is grateful to Angus Reid Institute for their commitment to providing broad and open access to this dataset.

## METADATA

---

### Dataset

Number of Cases = 1491

Number of Variables = 49

### Universe

Individuals 18 years and older who are members of the Angus Reid Forum panel.

### Geography

Canada

### Date of Collection

October 21-23, 2014

### Mode of data collection

Online survey

### Sampling procedure

1491 Canadians adults were randomly selected from Angus Reid Forum panel members.

For comparison purposes only, a probability sample of this size would carry a margin of error of +/- 2.5 percentage points, 19 times out of 20. Discrepancies in or between totals are due to rounding.

### Mode of data collection

Online survey

### Characteristics of the data collection situation

This survey was conducted in conjunction with the Baggage Fees, 2014, survey. The dataset was received by Data Services, Queen's University Library, as one dataset. Questions 1-8 concerns the Global Threats, 2014, survey and questions 9-13 the Baggage Fees, 2014, survey.

**Data processing notes**

The combined dataset was split by Data Services, Queen's University Library, into two datasets. The demographic and weight variables are the same for each dataset. The variable numbering from the original combined dataset was maintained in each dataset.

**Weight**

Weight variable = wgt
