

CMA variable

There were no values associated with CMA codes in the original data files deposited by The Surveillance Studies Centre.

The Social Science Data Centre sought information to confirm the values of these CMA codes. Based on information provided by researchers involved with The Surveillance Studies Centre, CMA codes were assigned by the Social Science Data Centre to their respective Census Metropolitan Areas according to the coding in Statistics Canada's 2001 [GeoSuite](#) product (Catalogue Number: 92F0150XCB).

The labels for values 996, 997, and 998 were added by the Social Science Data Centre based on information from the Surveillance Studies Centre.
